

PowerZone™ and Renaissance Responders™ Help You Engage Students in the Excitement of Learning!

Students excel with PowerZone and Renaissance Responders!

Capture their attention with multimedia action, team play, and game suspense. In a PowerZone “quiz bowl” event, challenging questions—combined with music, animation, special effects, game clocks, and scoreboards—create an exciting atmosphere for success.

PowerZone complements any textbook or curriculum. Concepts and lessons are reinforced with thought-provoking questions and instructional feedback. Research-based educational strategies prepare your students to excel—whether in the classroom or on “high stakes” tests. Renaissance Responders engage students during quiz-bowl events, while PowerZone’s multimedia, team interaction, and game elements stimulate their desire to achieve.

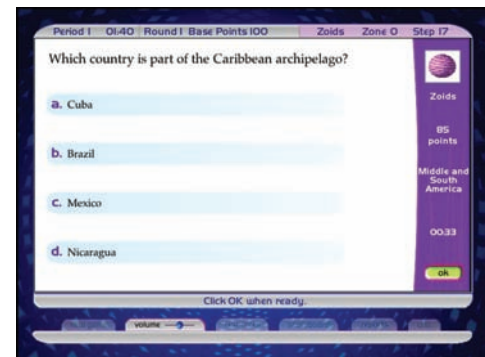

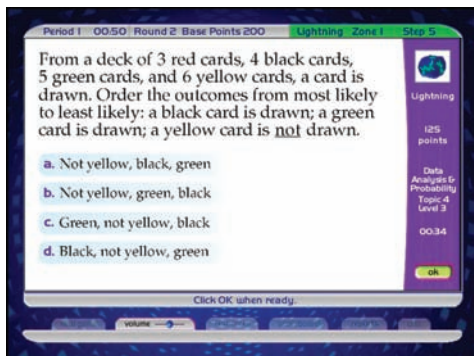

PowerZone features the cooperative-learning process: Two-Step Decisions.

In Step One, students are paired for peer-to-peer discussion to understand and answer questions. In Step Two, teams analyze pair decisions and collaborate to reach consensus.

Pair and team answers are submitted using Renaissance Responders—giving students and teachers immediate feedback. The data is then kept for individual, team, and class reports.

PowerZone puts you in control. Set the game length to your time schedule. Set question pace to challenge your students. Select from three PowerZone modes:

Extra Questions adds more content during a session; **Extra Media** uses more game elements and multimedia fun; **Assessment** uses tracking and reporting to provide an ideal alternative to traditional assessment.

Forty PowerZone RS titles are available for math, science, social studies, and health. Content is professionally developed according to state and national standards and standard test-

construction guidelines. Each PowerZone RS title targets the age level of students with appropriate tone, content, and graphics.

Together, PowerZone and Renaissance Responders combine for an exciting teach-and-learning opportunity.

Students Love Learning When They Use the 2Know!™ Classroom Response System and Renaissance Responders

With the 2Know! classroom response system, you can:

- **Build excitement for learning.** Students love the Renaissance Responders and become actively engaged in the learning process—even students who never participated before!
- **Obtain instant feedback.** State-of-the-art interactive communication technology helps you target your instruction more effectively to individual students.
- **Create assignments easily.** Enjoy access to 8,000 content items to easily create tests, quizzes, and other exercises in math, reading, language arts, science, and social studies.
- **Enjoy better technology for less.** 2Know! radio-frequency (RF) technology is not affected by line-of-sight obstructions and is more reliable than infrared (IR)-based communication.
- **Assess progress toward standards.** Download and import state or national standards and align content to your standards using the included AccelTest software.
- **Share with other classes.** The entire system moves from class to class easily in the included carrying case.

Renaissance Responders provide the very best features for ultimate functionality:

- Large LCD display allows questions to be fully viewed—no need for paper, projector, or TV.
- Easy scroll feature allows students to view longer questions and answer choices.
- Buttons designed, arranged, and color-coded for fast, easy use.
- Question types include multiple choice, True/False, Yes/No, ranking, and numeric responses.
- Works as a multi-function calculator, which you can disable during testing.
- Uses just two AA batteries, which will last the entire school year!
- Automatic power off after 30 minutes of inactivity.
- Lightweight, ergonomic design—ideal for one-hand use, frees other hand for writing.
